

FOR IMMEDIATE RELEASE

FBA, CBIF and Lely High School Construction Academy – One Success Story– Naples, FL

Naples, FL (September 10, 2010) – Brendon West is his name. He is a graduate of the 2009 Senior Class at Lely High School. He has been employed as a carpenter and assistant superintendent at Heatherwood Construction Company for over one year.

When Walter Crawford, president of Heatherwood, asked Greg Foote, Lely Construction Techniques instructor, who would make a good employee? Greg quickly recommended Brendon. Brendon was a stand-out student and a member of the Future Builders of America Program.

Brendon contributed to the completion of numerous projects including a 900 foot boardwalk at the North Naples Regional Collier Park and a 200 foot vehicular wooden bridge at the Conservancy of Southwest Florida.

The education and instruction Brendon received at the Lely High School Construction Academy prepared Brendon for the “real world.” Crawford, said “Brendon is a true blessing. He is hard working, skilled, eager to learn, and simply has a great attitude. The Construction Academies and FBA programs are working!”
